

Alameda County Employees' Retirement Association

**Governmental Accounting Standards Board
(GASB) Statement 67
Actuarial Valuation as of December 31, 2017**

This report has been prepared at the request of the Board of Retirement to assist in administering the Fund. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Board of Retirement and may only be provided to other parties in its entirety. The measurements shown in this actuarial valuation may not be applicable for other purposes.

*Board of Retirement
Alameda County Employees' Retirement Association
475 14th Street, Suite 1000
Oakland, CA 94612*

Dear Board Members:

We are pleased to submit this Governmental Accounting Standards Board (GASB) Statement 67 Actuarial Valuation as of December 31, 2017. It contains various information that will need to be disclosed in order to comply with GASB Statement 67.

This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Board to assist in administering the Association. The census and financial information on which our calculations were based was prepared by ACERA. That assistance is gratefully acknowledged.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.

The actuarial calculations were completed under the supervision of Eva Yum, FSA, MAAA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and expectations for the Association.

We look forward to reviewing this report with you and to answering any questions.

Sincerely,

Segal Consulting, a Member of The Segal Group, Inc.

By:

*Andy Yeung, ASA, MAAA, FCA, EA
Vice President and Actuary*

*Eva Yum, FSA, MAAA, EA
Associate Actuary*

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Purpose

This report has been prepared by Segal Consulting (“Segal”) to present certain disclosure information required by Governmental Accounting Standards Board (GASB) Statement 67 as of December 31, 2017. This valuation is based on:

- The benefit provisions of the Retirement Association, as administered by the Board of Retirement;
- The characteristics of covered active members, inactive vested members, and retired members and beneficiaries as of November 30, 2016, provided by the Retirement Association;
- The assets of the Plan as of December 31, 2017, provided by the Retirement Association;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

General Observations on GASB 67 Valuation

The following points should be considered when reviewing this GASB 67 report:

- The Governmental Accounting Standards Board (GASB) rules only define pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for pension funding purposes. Employers and plans still develop and adopt funding policies under current practices.
- When measuring pension liability, GASB uses the same actuarial cost method (Entry Age) and the same type of discount rate (expected return on assets) as ACERA uses for funding. This means that the Total Pension Liability (TPL) measure for financial reporting shown in this report is determined on generally the same basis as ACERA’s Actuarial Accrued Liability (AAL) measure for funding. We note that the same is generally true for the Normal Cost component of the annual plan cost for funding and financial reporting.
- The Net Pension Liability (NPL) is equal to the difference between the TPL and the Plan’s Fiduciary Net Position. The Plan’s Fiduciary Net Position is equal to the market value of assets and therefore, the NPL measure is very similar to an Unfunded Actuarial Accrued Liability (UAAL) calculated on a market value basis.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Significant Issues in Valuation Year

The following key findings were the result of this actuarial valuation:

- As we disclosed in our December 31, 2017 funding valuation report, the 7.25% investment return assumption that the Board approved on December 21, 2017 for determining the liabilities for funding purposes and used for establishing the employer and employee contribution rates has continued to be developed without considering the impact of any future 50/50 excess earnings allocation. This is based on our understanding that Article 5.5 of the Statute, which authorizes the allocation of 50% of excess earnings to the SRBR, does not allow for the use of a different investment return for funding than is used for interest crediting. This would appear in effect to preclude the prefunding of the SRBR through the use of an assumption lower than the market earnings assumption of 7.25%.

As required by the Actuarial Standard of Practice (ASOP) No. 4 (“Measuring Pension Obligations and Determining Pension Plan Costs or Contributions”), we performed a stochastic model to estimate the impact of the 50% allocation of future excess earnings to the SRBR. The results of our model indicated that the 50/50 allocation of future excess earnings would have about the same impact as an “outflow” (i.e., assets not available to fund the benefits included in the determination of the TPL) that would average approximately 0.60% of assets over time. This approximated outflow was incorporated into our GASB crossover test¹ (Exhibit 5), along with the additional future employer contributions that would result from those future allocations of excess earnings to the SRBR under ACERA’s funding policy.

- The NPLs measured as of December 31, 2017 and 2016 were determined by rolling forward the TPLs for the funded benefits as of December 31, 2016 and December 31, 2015, respectively. Similar to last year, in this year’s GASB 67 report we have included in the TPL as of December 31, 2017 the non-OPEB unlimited Actuarial Accrued Liability (AAL) of \$149.3 million, calculated by rolling forward the total unlimited non-OPEB AAL as of December 31, 2016 that was calculated under the new actuarial assumptions effective for the December 31, 2017 valuation.

We have also continued the practice of adjusting the Plan’s Fiduciary Net Position as of December 31, 2017 to include an additional \$43.9 million that was calculated by (a) taking the \$37.5 million set aside by the Retirement Board in the SRBR reserve to pay non-vested Supplemental COLA and retired member death benefits² as of December 31, 2017, and

¹ The purpose of the GASB crossover test is to determine if the full expected return (or 7.25% in this case) can be used as the discount rate to determine the TPL and the NPL. That is, if there is no crossover point where the projected benefit payments would exceed the Plan’s Fiduciary Net Position, then the full expected return assumption can be used. As detailed later in this report, ACERA does pass the crossover test, which means that the full 7.25% investment rate of return assumption can be used as the discount rate to determine the TPL and the resulting NPL.

² We have excluded the liability and the assets associated with the OPEB component of the SRBR reserve account because it is our understanding that those amounts are reportable under GASB 74/75.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

(b) adding \$6.4 million to reflect the proportion of one-half of the net deferred investment gain³ that is commensurate with the size of those reserves. The \$105.4 million difference between the \$149.3 million added to the TPL and the \$43.9 million added to the Plan's Fiduciary Net Position as of December 31, 2017 represents the Net Pension Liability attributable to non-OPEB SRBR benefits.

- It should be noted that in determining the Plan's Fiduciary Net Position as of December 31, 2016, we included a proportion of the deferred investment losses after netting out the Contingency Reserve that was commensurate with the size of the valuation reserves that would be available to the Pension Plan.⁴ In determining the Plan's Fiduciary Net Position as of December 31, 2017, we have included the \$77.1 million in the Contingency Reserve, plus \$8.6 million from the deferred investment gains that will be used to restore the Contingency Reserve to 1% of total assets, plus one-half of any deferred investment gains remaining after restoring the Contingency Reserve that would be available to the Pension Plan, as alluded to above.⁵
- The NPL decreased from \$2,243 million as of December 31, 2016 to \$2,014 million as of December 31, 2017, primarily as a result of the favorable investment return during calendar year 2017 of about \$602 million, offset somewhat by the effect of the changes in the actuarial assumptions (which increased the NPL by about \$317 million). Changes in these values during the last two fiscal years ending December 31, 2016 and December 31, 2017 can be found in Exhibit 3.
- The discount rates used to determine the TPL and NPL as of December 31, 2017 and 2016 were 7.25% and 7.60%, respectively, based on the assumptions that were used by the Association in the pension funding valuations as of those dates. The detailed calculations of the discount rate of 7.25% used in the calculation of the TPL and NPL as of December 31, 2017 can be found in Exhibit 5 of Section 2. Various other information that is required to be disclosed can be found throughout Exhibits 1-4 in Section 2.

³ After restoring the Contingency Reserve to 1% of total assets.

⁴ The proportionate share of the deferred market losses after netting out the Contingency Reserve was equal to \$302.8 million as of December 31, 2016.

⁵ One-half of the deferred market gains after restoring the Contingency Reserve to 1% of total assets is equal to \$150.2 million as of December 31, 2017.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Summary of Key Valuation Results

	2017	2016
Disclosure elements for plan year ending December 31:		
Service cost ⁽¹⁾	\$187,408,672	\$175,641,823
Total Pension Liability	9,123,899,264	8,410,978,895
Plan's Fiduciary Net Position ⁽²⁾	7,110,223,325	6,167,784,668
Net Pension Liability	2,013,675,939	2,243,194,227
Schedule of contributions for plan year ending December 31:		
Actuarially determined contributions	\$247,063,550	\$241,728,451
Actual contributions ⁽³⁾	247,063,550	241,728,451
Contribution deficiency (excess)	0	0
Demographic data for plan year ending December 31:⁽⁴⁾		
Number of retired members and beneficiaries	9,479	9,242
Number of vested terminated members ⁽⁵⁾	2,447	2,263
Number of active members	11,323	11,111
Key assumptions as of December 31:		
Investment rate of return	7.25%	7.60%
Inflation rate	3.00%	3.25%
Projected salary increases ⁽⁶⁾	General: 8.30% to 3.90% and Safety: 11.30% to 4.30%	General: 7.45% to 4.15% and Safety: 10.45% to 4.45%

⁽¹⁾ Service cost is based on the previous year's valuation, meaning the 2017 and 2016 values are based on the valuations as of December 31, 2016 and December 31, 2015, respectively. Both of the service costs have been calculated using the assumptions shown in the 2016 column, as there had been no changes in the actuarial assumptions between the December 31, 2015 and 2016 valuations.

⁽²⁾ For 2016, the Plan's Fiduciary Net Position amount shown (\$6,167,784,668) includes market value of assets (\$6,965,580,182), less OPEB-related SRBR assets (\$797,795,515; OPEB-related SRBR assets include a proportionate share of the deferred market losses after netting out the Contingency Reserve, reduced on a proportional basis relative to the total actual balances in the OPEB and non-OPEB reserves). For 2017, the Plan's Fiduciary Net Position amount shown (\$7,110,223,325) includes market value of assets (\$8,112,099,556), less OPEB-related SRBR assets (\$1,001,876,231; OPEB-related SRBR assets include one half of the deferred market gains after restoring the Contingency Reserve to 1% of total assets). Note that amounts may not total properly due to rounding.

⁽³⁾ Employer contributions are on a net basis after (i) considering the total cash contributions made by the employers, (ii) reducing by the employer contributions made to the 401(h) account, and (iii) increasing by the amount of transfer from the SRBR to the Employers Advance Reserve for employer contributions made to the 401(h) account in (ii).

⁽⁴⁾ Data as of December 31, 2016 is used in the measurement of the TPL as of December 31, 2017.

⁽⁵⁾ Includes members who left their contributions on deposit even though they have less than five years of service.

⁽⁶⁾ Includes inflation at 3.00% (3.25% for the December 31, 2016 valuation) plus real across-the-board salary increases of 0.50% plus merit and promotional increases.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Important Information about Actuarial Valuations

An actuarial valuation is a budgeting tool with respect to the financing of future projected obligations of a pension plan. It is an estimated forecast – the actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

In order to prepare an actuarial valuation, Segal relies on a number of input items. These include:

- **Plan of benefits** Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary in this report (as well as the plan summary included in our funding valuation report) to confirm that Segal has correctly interpreted the plan of benefits.
- **Participant data** An actuarial valuation for a plan is based on data provided to the actuary by ACERA. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
- **Assets** This valuation is based on the market value of assets as of the valuation date, as provided by ACERA. The Association uses an “actuarial value of assets” that differs from market value to gradually reflect six-month changes in the market value of assets in determining contribution requirements.
- **Actuarial assumptions** In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, termination, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan’s assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The valuation is prepared at the request of the Board to assist the sponsors of the Fund in preparing items related to the pension plan in their financial reports. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- If ACERA is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Board should look to their other advisors for expertise in these areas.

As Segal has no discretionary authority with respect to the management or assets of ACERA, it is not a fiduciary in its capacity as actuaries and consultants with respect to ACERA.

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

EXHIBIT 1

General Information – “Financial Statements”, Note Disclosures and Required Supplementary Information for a Cost-Sharing Pension Plan

Plan Description

Plan administration. The Alameda County Employees' Retirement Association (ACERA) was established by the Alameda County Board of Supervisors in 1947. ACERA is administered by the Board of Retirement and governed by the County Employees' Retirement Law of 1937 (California Government Code Section 31450 et. seq.). ACERA is a cost-sharing, multiple employer, defined benefit, public employee retirement system whose main function is to provide service retirement, disability, death, and survivor benefits to the General and Safety members employed by the County of Alameda. ACERA also provides retirement benefits to the employee members of First 5 Alameda County, Housing Authority of the County of Alameda, Alameda Health System, Livermore Area Recreation and Park District (LARPD), Superior Court of California—County of Alameda, and Alameda County Office of Education.

The management of ACERA is vested with the ACERA Board of Retirement. The Board consists of nine members and two alternates. The County Treasurer is a member of the Board of Retirement by law and is elected by the general public. Four members are appointed by the Board of Supervisors, one of whom may be a County Supervisor. Two active members are elected by the General members; one active member and one alternate are elected by the Safety members; one retired member and one alternate are elected by the retired members. All members of the Board of Retirement serve terms of three years except for the County Treasurer whose term runs concurrent with his term as County Treasurer.

Plan membership. At December 31, 2017, pension plan membership consisted of the following:

Retired members or beneficiaries currently receiving benefits	9,479
Vested terminated members entitled to, but not yet receiving benefits ⁽¹⁾	2,447
Active members	<u>11,323</u>
Total	23,249

⁽¹⁾ Includes terminated members due a refund of member contributions.

Note: Data as of December 31, 2017 is not used in the measurement of the TPL as of December 31, 2017.

Benefits provided. ACERA provides service retirement, disability, death, and survivor benefits to eligible employees. The first date of ACERA membership varies by employer, as follows:

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

- Alameda County, Alameda Health System and Alameda Superior Court Employees: Membership for these employees is effective on the first day of the second pay period following the employee's hire date in an ACERA covered position. This is the date of entry into ACERA membership. As of the date of entry, payroll deductions for retirement contributions begin and service credit for each hour worked is earned. During the short period between the beginning of employment and the ACERA plan date of entry, the employee does not pay contributions or earn service credit. A member may purchase this service credit (referred to as "days prior to entry") any time before retirement without changing the membership, but date of entry does not change.
- Housing Authority and Livermore Area Recreation and Park District Employees: Membership for these employees is effective on the first day of employee's hire in an ACERA covered position. The first date of employment is the date of entry into ACERA membership. As of this date of entry, payroll deductions for retirement contributions begin and service credit for each hour work is earned.
- First 5 Employees: Membership for these employees is effective on the first day of the second pay period following the employee's hire date.
- Office of Education Employees: This is a closed plan with no more active employees (i.e., there is no new ACERA membership).

There are separate retirement benefits for General and Safety members. Safety membership is extended to those involved in active law enforcement, deferred firefighters, or positions that have been designated as Safety by the Board of Retirement (e.g. Juvenile Hall Group Counselor, Probation Officer, etc.). All other employees are classified as General members.

Any new member who becomes a member on or after January 1, 2013 is placed into Tier 4 and is subject to the provisions of California Public Employees' Pension Reform Act of 2013 (PEPRA), California Government Code 7522 et seq. and Assembly Bill (AB) 197.

General members enrolled in Tiers 1, 2, or 3 are eligible to retire once they attain the age of 70 regardless of service or at age 50 with five or more years of retirement service credit and a total of 10 years of qualifying membership. A non-Tier 4 General member with 30 years of service is eligible to retire regardless of age. General members enrolled in Tier 4 are eligible to retire once they have attained the age of 52 and have acquired five years of retirement service credit, or at age 70 regardless of service.

Safety members enrolled in Tiers 1, 2, 2C, or 2D are eligible to retire once they attain the age of 70 regardless of service or at age 50 with five or more years of retirement service credit and a total of 10 years of qualifying membership. A non-Tier 4 Safety member with 20 years of service is eligible to retire regardless of age. Safety members enrolled in Tier 4 are

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

eligible to retire once they have attained the age of 50 and have acquired five years of retirement service credit, or at age 70 regardless of service.

The retirement benefit the member will receive is based upon age at retirement, final average compensation, years of retirement service credit and retirement plan and tier.

The tiers and their basic provisions are listed below:

<u>Tier Name</u>	<u>Service Retirement Governing Code Section</u>	<u>Effective Date</u>	<u>Basic Provisions</u>	<u>Final Average Salary Period</u>	<u>Plan Sponsors</u>
General Tier 1	§31676.12	Various	2.0% at 57; maximum 3% COLA	Highest 1-year	All
General Tier 2	§31676.1	June 30, 1983*	2.0% at 61; maximum 2% COLA	Highest 3-years	All except LARPD
General Tier 3	§31676.18	October 1, 2008	2.5% at 55; maximum 3% COLA	Highest 1-year	LARPD
General Tier 4	§7522.20(a)	January 1, 2013	2.5% at 67; maximum 2% COLA	Highest 3-years	All
Safety Tier 1	§31664.1	Various	3.0% at 50; maximum 3% COLA	Highest 1-year	County
Safety Tier 2	§31664.1	June 30, 1983	3.0% at 50; maximum 2% COLA	Highest 3-years	County
Safety Tier 2C	§31664	October 17, 2010	2.6% at 55; maximum 2% COLA	Highest 3-years	County
Safety Tier 2D	§31664.2	October 17, 2010	3.0% at 55; maximum 2% COLA	Highest 3-years	County
Safety Tier 4	§7522.25(d)	January 1, 2013	2.7% at 57; maximum 2% COLA	Highest 3-years	County

* For Housing Authority members, the effective date is September 30, 2011.

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

For members enrolled in Tiers 1, 2, 2C, 2D, or 3, the maximum monthly retirement allowance is 100% of final compensation. There is no maximum for members enrolled in Tier 4.

The member may elect an unmodified retirement allowance, or choose an optional retirement allowance. The unmodified retirement allowance provides the highest monthly benefit and a 60% continuance to an eligible surviving spouse or domestic partner. An eligible surviving spouse or domestic partner is one married to or registered with the member one year prior to the effective retirement date. There are four optional retirement allowances the member may choose. Each of the optional retirement allowances requires a reduction in the unmodified retirement allowance in order to allow the member the ability to provide certain benefits to a surviving spouse, domestic partner, or named beneficiary having an insurable interest in the life of the member.

ACERA provides an annual cost-of-living benefit to all retirees. The cost-of-living adjustment, based upon the Consumer Price Index for the San Francisco-Oakland-San Jose Area (with 1982-84 as the base period), is capped at 3.0% for General Tiers 1 and 3 and Safety Tier 1, and at 2.0% for General Tiers 2 and 4 and Safety Tiers 2, 2C, 2D, and 4.

The County of Alameda and the other participating agencies contribute to the retirement plan based upon actuarially determined contribution rates adopted by the Board of Retirement. Employer contribution rates are adopted annually based upon recommendations received from ACERA's actuary after the completion of the annual actuarial valuation. The average employer contribution rate as of December 31, 2017 for 2017 (based on the December 31, 2015 valuation for the second half of 2016/2017 and on the December 31, 2016 valuation for the first half of 2017/2018) was 24.83% of compensation.

Members are required to make contributions to ACERA regardless of the retirement plan or tier in which they are included. The average member contribution rate as of December 31, 2017 for 2017 (based on the December 31, 2015 valuation for the second half of 2016/2017 and on the December 31, 2016 valuation for the first half of 2017/2018) was 8.98% of compensation.

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

EXHIBIT 2

Net Pension Liability

The components of the Net Pension Liability are as follows:

	December 31, 2017	December 31, 2016
Total Pension Liability	\$9,123,899,264	\$8,410,978,895
Plan's Fiduciary Net Position	<u>7,110,223,325</u>	<u>6,167,784,668</u>
Net Pension Liability	\$2,013,675,939	\$2,243,194,227
Plan's Fiduciary Net Position as a percentage of the Total Pension Liability	77.93%	73.33%

The Net Pension Liability was measured as of December 31, 2017 and 2016. The Plan's Fiduciary Net Position (plan assets) was valued as of the measurement date while the Total Pension Liability was determined based upon rolling forward the Total Pension Liability from actuarial valuations as of December 31, 2016 and 2015, respectively.

Plan provisions. The plan provisions used in the measurement of the Net Pension Liability as of December 31, 2017 and December 31, 2016 are the same as those used in ACERA's funding valuations as of December 31, 2016 and December 31, 2015, respectively.

Actuarial assumptions. The Total Pension Liability as of December 31, 2017 was determined by an actuarial valuation as of December 31, 2016. The actuarial assumptions used to develop the December 31, 2017 TPL are the same assumptions used in the December 31, 2017 funding valuation for ACERA. In particular, the following actuarial assumptions were applied to all periods included in the measurement:

	<u>December 31, 2017</u>
Inflation	3.00%
Salary increases	General: 8.30% to 3.90% and Safety: 11.30% to 4.30%, vary by service, including inflation
Investment rate of return	7.25%, net of pension plan investment expense, including inflation
Other assumptions	See analysis of actuarial experience during the period December 1, 2013 through November 30, 2016

The Total Pension Liability as of December 31, 2016 was determined by an actuarial valuation as of December 31, 2015. The actuarial assumptions used to develop the December 31, 2016 TPL are the same assumptions used in the December 31, 2016 funding valuation for ACERA. In particular, the following actuarial assumptions were applied to all periods included in the measurement:

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

December 31, 2016

Inflation	3.25%
Salary increases	General: 7.45% to 4.15% and Safety: 10.45% to 4.45%, vary by service, including inflation
Investment rate of return	7.60%, net of pension plan investment expense, including inflation
Other assumptions	See analysis of actuarial experience during the period December 1, 2010 through November 30, 2013

The long-term expected rate of return on pension plan investments⁶ was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. The returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before deducting investment expenses, used in the derivation of the long-term expected investment rate of return assumption for the December 31, 2017 valuation are summarized in the following table:

Asset Class	Target Allocation	Long-Term (Arithmetic) Expected Real Rate of Return
Domestic Large Cap Equity	22.40%	5.75%
Domestic Small Cap Equity	5.60%	6.37%
Developed International Equity	19.50%	6.89%
Emerging Markets Equity	6.50%	9.54%
U.S. Core Fixed Income	11.25%	1.03%
High Yield Bonds	1.50%	3.99%
International Bonds	2.25%	0.19%
TIPS	2.00%	0.98%
Real Estate	8.00%	4.47%
Commodities	3.00%	3.78%
Hedge Funds	9.00%	4.30%
Private Equity	<u>9.00%</u>	7.60%
Total	100.00%	

⁶ Note that the investment return assumption for funding purposes was developed net of both investment and administrative expenses; however, the same investment return assumption was used for financial reporting purposes, and it was considered gross of administrative expenses for financial reporting purposes. (This resulted in an increase in the margin for adverse deviation when using that investment return assumption for financial reporting.)

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

Discount rate: The discount rate used to measure the Total Pension Liability was 7.25% as of December 31, 2017 and 7.60% as of December 31, 2016. Our understanding is that Article 5.5 of the Statute, which authorizes the allocation of 50% of excess earnings to the SRBR, does not allow for the use of a different investment return assumption for funding than is used for interest crediting. In order to reflect the provisions of Article 5.5, we have treated future allocations to the SRBR as an additional outflow against the Plan's Fiduciary Net Position in the GASB crossover test, as mentioned earlier in Section 1. Again, we are estimating that the additional outflow would average approximately 0.60% of assets over time, based on the results of our stochastic modeling of the 50% allocation of future excess earnings to the SRBR.

The projection of cash flows used to determine the discount rate assumes plan member contributions will be made at the current member contribution rates, and that employer contributions will be made at rates equal to the actuarially determined contribution rates⁷ plus additional future contributions that would follow from the future allocation of excess earnings to the SRBR. Projected employer contributions that are intended to fund the service costs for future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Also, while we have included the \$77.1 million in the Contingency Reserve plus \$8.6 million from the deferred investment gains that will be used to restore the Contingency Reserve to 1% of total assets in developing the NPL as of December 31, 2017, such amounts have been excluded in developing the projected employer contributions. Based on those assumptions, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability as of both December 31, 2017 and December 31, 2016.

Sensitivity of the Net Pension Liability to changes in the discount rate. The following presents the Net Pension Liability as of December 31, 2017, calculated using the discount rate of 7.25%, as well as what the Net Pension Liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25%) or 1-percentage-point higher (8.25%) than the current rate:

	1% Decrease (6.25%)	Current Discount Rate (7.25%)	1% Increase (8.25%)
Net Pension Liability as of December 31, 2017	\$3,209,656,035	\$2,013,675,939	\$1,028,303,785

⁷ For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included.

EXHIBIT 3

Schedule of Changes in Net Pension Liability – Last Two Fiscal Years

	2017	2016
Total Pension Liability		
Service cost	\$187,408,672	\$175,641,823
Interest	636,556,488	603,168,007
Change of benefit terms	0	0
Differences between expected and actual experience	17,516,316	-68,175,766
Changes of assumptions	316,727,508	150,676,929
Benefit payments, including refunds of employee contributions	<u>-445,288,615</u>	<u>-422,222,837</u>
Net change in Total Pension Liability	\$712,920,369	\$439,088,156
Total Pension Liability – beginning	<u>8,410,978,895</u>	<u>7,971,890,739</u>
Total Pension Liability – ending (a)	<u>\$9,123,899,264</u>	<u>\$8,410,978,895</u>
Plan's Fiduciary Net Position		
Contributions – employer ⁽¹⁾	\$247,063,550	\$241,728,451
Contributions – employee	89,325,824	85,736,229
Net investment income	1,065,909,076	423,717,554
Benefit payments, including refunds of employee contributions	-445,288,615	-422,222,837
Administrative expense	-14,571,178	-14,617,450
Other	<u>0</u>	<u>0</u>
Net change in Plan's Fiduciary Net Position	\$942,438,657	\$314,341,947
Plan's Fiduciary Net Position⁽²⁾ – beginning	<u>6,167,784,668</u>	<u>5,853,442,721</u>
Plan's Fiduciary Net Position⁽²⁾ – ending (b)	<u>\$7,110,223,325</u>	<u>\$6,167,784,668</u>
Net Pension Liability – ending (a) – (b)	<u>\$2,013,675,939</u>	<u>\$2,243,194,227</u>
Plan's Fiduciary Net Position as a percentage of the Total Pension Liability	77.93%	73.33%
Covered payroll⁽³⁾	\$995,178,209	\$947,567,631
Plan Net Pension Liability as percentage of covered payroll	202.34%	236.73%

⁽¹⁾ Employer contributions are on a net basis after (i) considering the total cash contributions made by the employers, (ii) reducing by the employer contributions made to the 401(h) account, and (iii) increasing by the amount of transfer from the SRBR to the Employers Advance Reserve for employer contributions made to the 401(h) account in (ii).

⁽²⁾ For 2017 "Plan's Fiduciary Net Position – beginning," the amount shown (\$6,167,784,668) includes market value of assets (\$6,965,580,182), less OPEB-related SRBR assets (\$797,795,515; OPEB-related SRBR assets include a proportionate share of the deferred market losses after netting out the Contingency Reserve, reduced on a proportional basis relative to the total actual balances in the OPEB and non-OPEB reserves). For 2017 "Plan's Fiduciary Net Position – ending," the amount shown (\$7,110,223,325) includes market value of assets (\$8,112,099,556), less OPEB-related SRBR assets (\$1,001,876,231; OPEB-related SRBR assets include one half of the deferred market gains after restoring the Contingency Reserve to 1% of total assets). Note that amounts may not total properly due to rounding.

⁽³⁾ For fiscal year 2017, covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based. For fiscal year 2016, covered payroll was referred to as covered-employee payroll and only Compensation Earnable and Pensionable Compensation that would go into the determination of retirement benefits was included.

EXHIBIT 4

Schedule of Contributions – Last Ten Fiscal Years

Year Ended December 31	Actuarially Determined Contributions	Contributions in Relation to the Actuarially Determined Contributions	Contribution Deficiency (Excess)	Covered Payroll⁽¹⁾	Contributions as a Percentage of Covered Payroll
2008	\$129,660,363	\$129,660,363	\$0	\$810,712,790	15.99%
2009	132,198,602	132,198,602	0	838,141,323	15.77%
2010	147,543,301	147,543,301	0	839,617,361	17.57%
2011	162,879,221	162,879,221	0	837,482,162	19.45%
2012	179,648,812	179,648,812	0	845,932,592	21.24%
2013	191,180,146	191,180,146	0	853,349,657	22.40%
2014	213,254,775	213,254,775	0	886,924,862	24.04%
2015	224,607,104	224,607,104	0	945,858,017 ⁽²⁾	23.75%
2016	241,728,451	241,728,451	0	947,567,631	25.51%
2017	247,063,550	247,063,550	0	995,178,209	24.83%

⁽¹⁾ For the year ended December 31, 2017, covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based. For the years ended before December 31, 2017, covered payroll was referred to as covered-employee payroll and only Compensation Earnable and Pensionable Compensation that would go into the determination of retirement benefits was included.

⁽²⁾ ACERA indicated that this amount is based on 27 pay periods for 2015.

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

Notes to Exhibit 4

Methods and assumptions used to establish "actuarially determined contribution" rates:

Valuation date	Actuarially determined contribution rates for the first six months of calendar year 2017 (or the second half of fiscal year 2016/2017) are calculated based on the December 31, 2015 valuation. Actuarially determined contribution rates for the last six months of calendar year 2017 (or the first half of fiscal year 2017/2018) are calculated based on the December 31, 2016 valuation.
Actuarial cost method	Entry Age Actuarial Cost Method
Amortization method	Level percent of payroll (3.75% payroll growth assumed)
Remaining amortization period	
December 31, 2015 valuation	Prior to January 1, 2012, the total UAAL was amortized on a 30-year decreasing period, with 21 years remaining as of December 31, 2011 (and 17 years remaining as of December 31, 2015). On or after January 1, 2012, any new UAAL resulting from plan amendments are amortized over separate decreasing 15-year periods; early retirement incentive programs (ERIPs) are amortized over separate decreasing 5-year periods; assumption and method changes are amortized over separate decreasing 20-year periods; and experience gains/losses are also amortized over separate decreasing 20-year periods.
December 31, 2016 valuation	Prior to January 1, 2012, the total UAAL was amortized on a 30-year decreasing period, with 21 years remaining as of December 31, 2011 (and 16 years remaining as of December 31, 2016). On or after January 1, 2012, any new UAAL resulting from plan amendments are amortized over separate decreasing 15-year periods; early retirement incentive programs (ERIPs) are amortized over separate decreasing 5-year periods; assumption and method changes are amortized over separate decreasing 20-year periods; and experience gains/losses are also amortized over separate decreasing 20-year periods.
Asset valuation method	The actuarial value of assets is determined by recognizing any difference between the actual and the expected market return over 10 six-month interest crediting periods. The actuarial value of assets is further adjusted, if necessary, to be within 40% of the market value of assets. The valuation value of assets is the actuarial value of assets reduced by the value of the non-valuation reserves.

SECTION 2: GASB 67 Information for the Alameda County Employees' Retirement Association

EXHIBIT 5

Projection of Pension Plan's Fiduciary Net Position for Use in Calculation of Discount Rate as of December 31, 2017

(\$ in millions) - continued

Notes:

- (1) Amounts may not total exactly due to rounding.
- (2) Amounts shown in the year beginning January 1, 2017 row are actual amounts, based on the financial statements provided by ACERA. The Plan Fiduciary Net Position as of 12/31/2017 differs from the amount used for other GAS 67 purposes in that it excludes the Contingency Reserve of \$77,124,340.17 plus \$8,638,696.50 of the Gross Market Stabilization Reserve expected to be used to bring the Contingency Reserve up to 1% of total assets. These assets are not used in developing the projected total contributions in column (b).
- (3) Years 2026-2040, 2046-2085, 2096-2105, and 2111-2130 have been omitted from this table.
- (4) Column (a): Except for the "discounted value" shown for 2132, all of the projected beginning plan fiduciary net position amounts shown have not been adjusted for the time value of money.
- (5) Column (b): Projected total contributions include employee and employer normal cost contributions based on closed group projections (based on covered active members as of November 30, 2016); plus employer contributions to the unfunded actuarial accrued liability; plus employer contributions to fund each year's annual administrative expenses as well as future allocations of excess earnings to the SRBR under ACERA's funding policy, both reflecting a 20-year amortization schedule. Contributions are assumed to occur halfway through the year, on average.
- (6) Column (c): Projected benefit payments have been determined in accordance with paragraph 39 of GASB Statement No. 67, and are based on the closed group of active, inactive vested, retired members, and beneficiaries as of November 30, 2016. The projected benefit payments reflect the cost of living increase assumption of 3.00% per annum for Tiers 1 and 3, and 2.00% per annum for Tiers 2 and 4. The projected benefit payments include the Non-OPEB Supplemental Retiree Benefits Reserve (SRBR) benefits to the extent the current Non-OPEB SRBR (including the portion of deferred investment gain as of December 31, 2017 that is expected to be allocated to the SRBR) supports those benefits. Benefit payments are assumed to occur halfway through the year, on average. In accordance with paragraph 31.b.(1)(e) of GASB Statement No. 67, the long-term expected rate of return on Plan investments of 7.25% per annum was applied to all periods of projected benefit payments to determine the discount rate.

In addition, the projected benefit payments in column (c) include an amount equal to 0.60% of the beginning-of-year market value to reflect the approximated outflow of future allocations to the SRBR. This outflow has an estimated present value of \$0.77 billion. This present value of outflow is expected to be sufficient to pay for the remaining present value of the non-OPEB SRBR benefits of \$0.14 billion as well as the remaining present value of the OPEB SRBR benefits of \$0.25 billion.
- (7) Column (d): Projected administrative expenses are calculated as approximately 0.24% of the beginning plan fiduciary net position amount. The 0.24% portion was based on the actual fiscal year 2017 administrative expenses as a percentage of the beginning plan fiduciary net position amount as of January 1, 2017. Administrative expenses are assumed to occur halfway through the year, on average.
- (8) Column (e): Projected investment earnings are based on the assumed investment rate of return of 7.25% per annum.
- (9) As illustrated in this Exhibit, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments for current Plan members. In other words, there is no projected "cross-over date" when projected benefits are not covered by projected assets. Therefore, the long-term expected rate of return on Plan investments of 7.25% per annum was applied to all periods of projected benefit payments to determine the total pension liability as of December 31, 2017 shown earlier in this report, pursuant to paragraph 44 of GASB Statement No. 67.

5531160v8/05579.025
